# Why Brother for warehouse labelling?

## A printer for every need

Our printer range has been designed to support the wide variety of warehouse labelling requirements. From high volume and static to specialist and portable, you can rely on our desktop, mobile and industrial label printers to get the job done.

## "At your side"

We offer unrivalled support levels and will be "At your side" whenever you need us. Only by fully understanding your needs and working collaboratively with our partners can we deliver our unbeatable support and service.

Whether that means providing the features that really matter to you or helping your warehouse operations function at their best, our "At your side" promise ensures you always have the best possible experience with our products and our people.

## We are the print experts

Brother has been innovating and developing labelling machines for over 30 years. Our heritage and award-winning range of document printers, multifunction devices and scanners are the foundation upon which our expertise is built.

## Make integration effortless

Offering seamless integration, our label printers support a variety of printer command languages including ZPL2 emulation. Replacing legacy systems is simple - just plug and play.

## Free demo printers

To convince you of the outstanding performance of our products, we offer a free-of-charge printer including supplies for testing and evaluation purposes. This way we can identify your needs early on and ensure the needed integration.

## Managed Label Services

Transform the way you buy thermal label printing solutions with our hardware-as-a-service platform, managed label services.

With Brother's managed label services, you can combine premium-quality label printers, third-party hardware and solutions and additional services on a monthly subscription plan.

It's a great way to complete your important labelling tasks and stay up to date with the latest technology, without making a big investment upfront.

## The right partners

Seamless integration is a necessity for integrating tech into your productive warehouse processes. Putting compatibility with industry wide software platforms at the forefront of design, we've teamed up with some of the biggest names in the business to ensure that you can continue using your existing software with our innovative machines.

SAP and all SAP logos are trademarks or registered trademarks of SAP SE in Germany and in several other countries.

# 3 YEAR WARRANTY

## Best in class service packages

We know that for businesses like yours, downtime can be costly and frustrating. That's why Brother's free 3-year return to base warranty, inclusive of print heads with up to 30km print usage, comes as standard.

For additional security, we offer enhanced warranties, making it possible to prolong the warranty up to 5 years or expand the service level to onsite or same-day printer replacement.\*

\*Full T&Cs apply.

## Rugged mobile label printers

Our mobile printers are lightweight, compact and extremely rugged. Printing up to 4" receipts, product and barcode labels with ease, they improve efficiency and productivity in the most demanding and tough environments.

Efficient warehousing operations and worker productivity are critical to the success of many companies. Using wireless or Bluetooth connectivity, the RJ mobile printer range provides the ability to print barcode labels on-demand, at the point of application. This saves time and reduces potential errors caused by mislabelling.

Mobile printers come in three different sizes making it possible to print the exact label size needed. They are robust and ruggedised with a drop height of up to 2.5m.

Whether worn on-body or fixed on the forklift, the RJ series is ideal for on the spot labelling tasks.

# Desktop label printers

Receiving

Shipping

Our desktop label printers are optimised for mid-volume printing, meaning they can easily print hundreds of labels per day. They are the perfect solution for printing shipping labels that comply with all of the main service providers.

Our printers come with two different print technologies: direct thermal and thermal transfer. Direct thermal is a great option for labels with a standard lifespan while thermal transfer offers durability when the label will be exposed to harsh environments or the label lifespan expectations are higher.

Brother's high specification desktop label printers bring you improved operational efficiency with easy to use, high speed and continuous label printing. Supporting a variety of printer command languages, including ZPL II emulation, the TD printers allow you to integrate into existing legacy systems, whilst the modular design allows users to print from virtually anywhere in the workplace.

- TD Series – key features\***
- ✓ Direct thermal and thermal transfer print technology
  - ✓ Label width: 19mm – 118mm
  - ✓ Print speed up to 203mm/sec
  - ✓ Print resolution up to 300dpi
  - ✓ Max. roll diameter: 127mm
  - ✓ Ribbon capacity up to 300m
  - ✓ USB, USB Host, Serial, LAN, Bluetooth and Wi-Fi connectivity
  - ✓ RFID technology
  - ✓ Peeler and cutter for improved efficiency (optional)
  - ✓ Platen roller and print heads for TD-4D available as accessories

# Industrial label printers

Receiving

Shipping

Our Industrial label printers are optimised for high-volume printing – they can easily print thousands of labels per day. The durable printers are perfect for printing pallet labels for incoming goods and shipping labels for outgoing goods.

With fast print speeds and high ribbon capacity, our efficient TJ industrial printers ensure no time is wasted printing or changing supplies. Time saved can be spent focusing on the job and working more efficiently – saving money in the long term.

Fast print speeds help you keep up with increasing demand, especially when scaling up for peak periods. With an internal rewinder on selected models, you can also multi-task by sending your labels to print and collecting the ready printed label roll whenever required.

A wide range of models with different display options ensures ease of use and an outstanding user experience.

## TJ Series – key features\*

- ✓ Direct thermal and thermal transfer print technology
- ✓ Label width: 20 mm – 114 mm
- ✓ Print speed up to 356 mm/sec
- ✓ Print resolution up to 300 dpi
- ✓ Max. roll diameter: 203 mm
- ✓ Ribbon capacity up to 600 m
- ✓ Internal label rewinder
- ✓ USB, USB Host, Serial, LAN, Bluetooth and Wi-Fi connectivity
- ✓ Cutter and peeler (with rewinder) for improved efficiency (optional)
- ✓ Durable metal frame

# Supplies

# Accessories

## Every size you need

Our supplies have been designed to suit all of your warehouse labelling applications. For example:

- Picking label
- Shipping label
- Pallet label
- Shelf label
- Caution label
- Compliance label
- Quality control label

Our supplies range for the thermal transfer printers includes coated and uncoated label options in variable lengths and common sizes. For thermal transfer a ribbon is also needed: our black ribbons come in a range of widths and lengths. They are also available in a variety of standard or premium wax and resin ribbons.

For more information on supplies, contact your Brother account manager.

## Upgrade your solution

Our range of accessories is designed to help you maximise the functionality and usability of your label printer. From smart batteries for our mobile devices to cutters and peelers for our desktop and industrial models, upgrade your solution to supercharge your productivity.

Tablet not included

### Custom label requirements

Should you not be able to find the appropriate label size in our portfolio, then do not hesitate to contact us. We are happy to listen to your needs and see if we can develop the label that meets your requirements.

[Download Brochure - All the ingredients you need for effective food labelling - Click here](#)

### Smart battery

Detects battery usage and provides the data to report the health of the battery. That means your RJ3 or RJ4 mobile printer can last longer, printing labels on a single battery charge that lasts the whole shift.

### Tablet holder

Create a compact and robust labelling solution by securely mounting your desired tablet to a Brother TD-4D desktop label printer. Simple to install, you can enjoy the flexibility of creating your labels or receipts directly at the device with this handy accessory.

### Cutter

When using a continuous roll with your Brother desktop or industrial label printer, you can print any size to fit your needs. By automatically cutting labels as they are printed, a clean cut and ease of use is ensured.

### Peeler with liner rewinder

Tired of the long liners when printing? For selected industrial printers, we offer a peeler option including liner rewinder. This way efficiency and a clean working area is ensured.
