

MANAGED PRINT SERVICES (MPS)

For the first time ever, Managed Print Services (MPS) can be extended beyond the warehouse door to enable you to better plan, maintain and budget for your fleet of mission critical thermal and line matrix printers. Most of you will be familiar with the concept of MPS to optimise printer and photocopying devices in your front office (often referred to as “click”).

Up until now, no one has offered such a solution to manage labelling and printer fleets in warehouses, logistics, and your supply chain, but now we can. This is not just for new printers, we offer a full “walk in take over” service so there is no disruption to your mission critical barcode and label printers.

MPS Package

Within our MPS package we have the expertise to:

- Audit your existing print assets, recommending cost reduction
- Help implement a redundancy/ replacement strategy for them
- Recommend and supply the best printer to meet your requirements
- Maintain and service your machines on a fully inclusive (parts labour, consumables) on a 3-5 year contract.
- Finance to suit your budget
- Provide on-going performance reporting
- Add / subtract / move printers around as your business grows

For a fixed quarterly fee you'll have complete visibility and control of your warehouse printing and expenditure, leaving you free to focus on getting your products out to customers rather than worry about who's responsible for each machine.

We support all major brands of thermal, line matrix, and serial matrix printers that you may have within your organisation. Our engineers provide “on-demand, scheduled, and preventative maintenance” support to suit your seasonal and peak trading periods.

Our latest specialist Managed Print Services (MPS) for rugged hardware, supply chain environments, will also include cloud, rental and fully outsourced options. Efficiently deployed MPS can cut print costs by more than a third as well as increasing productivity.

Additional Services Available

Auto ID Services

We offer a comprehensive range of services, from the supply and support of new, as well as legacy equipment - even if the manufacturer has discontinued or rebranded the unit. We also supply a complete range of accessories for all makes and models of barcode scanners such as screen protectors, styluses, batteries and wrist straps.

Audit and discovery

Our pre-sales engineers will undertake a full site audit to find / recommend the best printer solutions to meet your supply chain delivery requirements.

Maintenance

We offer a flexible approach to maintenance and can tailor a contract to suit your needs.

Hardware

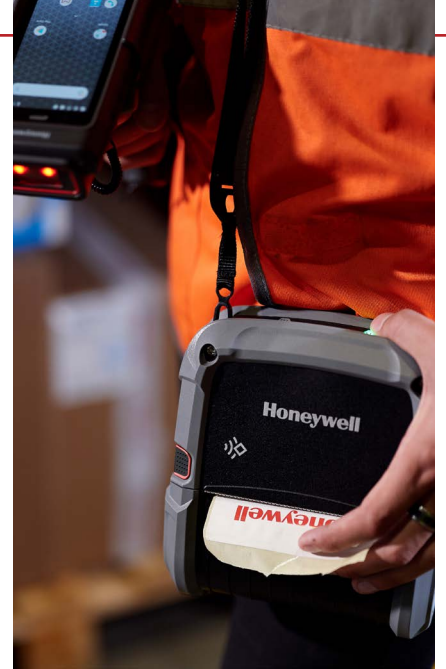

We supply printers, printheads, print servers as well as all major brands of barcode scanner and handheld equipment.

Media and Consumables

We fully understand the importance of using the correct media and consumables in mission critical printers, to ensure perfect print quality and enhance the life of your printer asset. We provide a large range of media and consumables for all manufacturers.

In addition to supplying these items, we will also work with you to ensure you are using the correct product for quality and cost effectiveness.

We have a complete range of managed printer services and solutions for all impact and thermal printers. With fully comprehensive packages that can be financed over 3/5 years, demonstrating significant cost savings over a traditional purchase and after market support model.

Repairs Management

Getting the best value out of the technology you have invested in makes perfect sense. Recycling, repairing and re-using your existing estate of hand held terminals, scanners, printers, tablets etc. is beneficial from both a monetary and environmental impact perspective.

Renovotec have a team of Manufacturer trained repair technicians, with in excess of 20 years experience, who can help prolong the lifecycle of your technology.

There are a variety of ways in which Renovotec can assist with your repair requirements and all carry a 90 day warranty.
