

RENOVOTEC RENTALS

INCREASE THE FLEXIBILITY OF YOUR MOBILE COMPUTING SOLUTIONS

Whatever industry you work in, whatever you use mobile computing for, there are always times in the year when you could benefit from additional devices.

You hire temporary staff and assets to manage increased workloads, so why not hire temporary devices too?!

"Peace of mind" GUARANTEE

All devices from Renovotec come complete with a support and maintenance package, providing you with the reassurance that your mobile hardware is delivering optimal performance and minimising the burden on your internal IT resources.

If a device fails and we can't provide a solution over the phone through our help desk, we'll make sure the device is replaced on a next day basis with another device configured to your exact requirements.

Flexible Solutions

Now you can increase the flexibility of your mobile computing solution with our "Honeywell Rugged Hardware Rentals Solutions" or Renovotec's "Switch to Android Rugged Rental offering".

Renovotec's latest 'switch to Android' offering allows supply chain users to move to a modern Android environment without the need for capital expenditure, by renting a wide range of leading Honeywell Android rugged mobile devices with Renovotec support. Companies can use rugged rental to phase in Android gradually, trialling what is best for them, or make the transition in one.

Hardware rental is the ideal solution for companies needing to respond quickly and flexibly to any seasonal spike in consumer demand, with no capital outlay.

Honeywell

Flexible contracts to suit your requirements and budget

Borrow the devices you need from us for just a matter of months or invest in a longer term contract, the choice is yours. Whatever you choose and regardless of the number of devices, the price per device is fixed for the term of the contract.

To calculate your monthly cost per device we consider:

- Term of the contract (in months)
- Min number of devices required at any one time
- Max number of devices required at any one time
- Software required
- Deployment environment

Hassle free implementation and management

When you hire Honeywell devices from Renovotec you won't need to lift a finger. We'll ensure that every device you hire is ready to use straight out of the box. This means we'll configure every device's settings to your exact requirements, install software and even charge the battery. We can work with your IT teams to pre-load your existing software or our specialist team can develop software that meets your specific requirements.

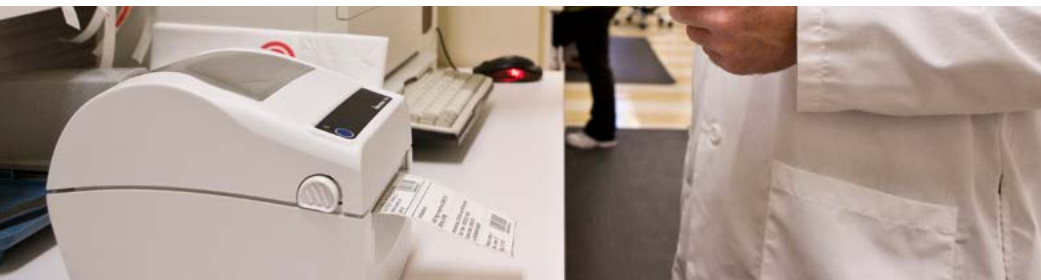

Complimentary Technologies

All components of a mobile computing solution can be hired with Renovotec Rentals. Warehouse systems including wireless and LAN infrastructure are designed, deployed and supported within the 'per device' monthly Renovotec Rentals charge. Stationary or Honeywell mobile barcode printers and scanners can also be included and quantities adjusted to suit operational demands.

Benefits

Outsource the ownership, deployment, management and support of your AutoID and mobile computing systems to Renovotec today and start realising the benefits immediately.

- Flexibility to increase and decrease the number of devices to match your operational workload
- Enhance your productivity
- Remove the hassle of implementing and managing additional devices
- Take advantage of support and maintenance packages that provide complete peace of mind
- Range of Honeywell devices to choose from, ready to use straight out of the box

Guardian Managed Services

Our Guardian Managed Services are security focused, end-to-end support packages designed to ensure your mobile device estate is safe. Managed services go way beyond traditional Help Desk support and remote mobile device diagnostics. By giving you access to our highly trained subject experts and providing complete management of third parties and manufacturers, we become your one-stop shop for support across your device estate. Whilst you focus on managing your business needs, Renovotec will ensure that your mobile devices are protected from security threats. There is no per "ticket" or "incident" charge, they are all covered under your chosen comprehensive Guardian service package.
